

*Cephalo MD*, an emerging multidisciplinary neurology practice in Vancouver, British Columbia, is seeking a *General Neurology* locums, with the opportunity to transition into a long-term contracted position for those wanting to build a practice in Vancouver.

Cephalo MD is a modern, team-based neurosciences clinic integrating General Neurology, Clinical Neurophysiology (including EMG), and allied health services within a collaborative care model. Our practice is designed to support high-quality, evidence-based neurological care in an efficient and professionally rewarding environment. Our hope is to expand further to include psychiatry, neurosurgery, counselling, physiotherapy, occupational therapy, and nursing support through team based initiatives in BC.

About Cephalo MD - [www.cephalamd.ca](http://www.cephalamd.ca)

## We offer:

- Fully staffed administrative and patient care coordination support at a favourable % split or room rate.
- Access to optimized EMR workflow and structured intake systems
- In-house EMG services (optional, depending on skillset and interest) +/- tech support depending on availability
- Flexible scheduling (in-person and virtual)
- A collegial, supportive, growth-oriented practice culture

## Locum Details:

- Duration: August 2026 (flexible start/end dates available)
- Scope: General Neurology outpatient consultations and follow-ups
- EMG opportunities available (optional)
- Mentorship and business in medicine support available

**Must be eligible to work in Canada, have CPSBC licensing, and CMPA coverage This opportunity may be particularly well suited for:**

- Upcoming R5 graduates exploring community neurology practice
- Fellows completing subspecialty training seeking general neurology exposure
- Early-career neurologists interested in building a long-term Vancouver-based practice

Our clinic emphasizes clinical excellence, efficiency, professionalism, and a patient-centered approach. For individuals seeking both autonomy and a strong support infrastructure, this role provides an ideal bridge between training and independent practice.
